PROFESSIONAL SUMMARY

Statistics graduate (B.S., GPA 3.7) with hands-on projects in SQL, Python, R, Excel, and Power BI. Experienced in data validation, forecasting, dimensional modeling, KPI reporting, and communicating analytical findings.

EDUCATION

Northern Illinois University — B.S. in Statistics *May 2026*

University Honors Program | GPA: 3.7/4.0 | Minors: Applied Mathematics and Geography

SELECTED ANALYTICS PROJECTS

GridCast: Energy Demand Forecasting | Python, Power BI, DAX, Power Query

- Developed an AI-assisted pipeline using 61,368 hourly EIA-930 demand records; compared five models and achieved 4.38% WAPE and 13.2% lower MAE than a daily baseline on 8,735 held-out 2025 hours.
- Built a four-page Power BI Service report with 28 DAX measures and dimensional modeling; validated refresh and filters and identified high-demand underprediction and weaker interval coverage.

Medicare Provider Spending Analysis | SQL, PostgreSQL, Excel

- Modeled 2,460 CMS provider-service records in PostgreSQL using CTEs and window functions; built an Excel KPI dashboard to compare payment concentration and provider utilization.
- Identified CPT 99214 as a $5.65M payment driver (20.8% of cohort payments); distinguished service-unit and beneficiary denominators when interpreting provider variation.

GraphOS: Validated Retail Analytics Demo | Python, JavaScript, HTML/CSS

- Directed AI-assisted development of a local analytics demo; profiled six fictional retail tables with 114,256 records and independently reconciled cancellation shares across 60 channel/month groups.
- Designed charts, tables, and data-quality summaries; verified two saved results reopened unchanged after restart and demonstrated a separate backup and restore-copy workflow.

Quantium Retail Customer Analytics | Forage Virtual Job Simulation | R, Excel

- Analyzed 246,739 cleaned chip line items across 71,287 customers and 21 segments; reconciled the top three segments' 24.9% sales share to inform assortment and promotion analysis.

NIU Honors Capstone: Dreaming in Different Cultures | R, Statistical Modeling

- Developed a cross-cultural research plan and demonstrated Poisson regression on 1,600 synthetic rows, documenting the method and limits of simulation-based findings.

TECHNICAL SKILLS

Tools & visualization: SQL/PostgreSQL (CTEs, Window Functions), Python (pandas, NumPy, scikit-learn), R, Excel (PivotTables, Dashboards), Power BI Service, DAX, Power Query
Analytics & methods: Data Validation, Forecasting, Dimensional Modeling, Regression, Inference, KPI Reporting

EXPERIENCE

Delivery Driver — Genco Delivery LLC (Amazon deliveries) *Sep 2026 – Present*

- Completed delivery routes, scanned packages, and maintained delivery records while managing scheduled stops.

Certified Tennis Instructor — Naperville Park District *Apr 2025 – Sep 2026*

- Coordinated recurring sessions for five participants; tracked progress and communicated performance feedback.

Data Entry and Inventory Control — GEODIS *Dec 2024 – Feb 2025*

- Verified and corrected approximately 100 shipment records daily; maintained data quality in Excel datasets exceeding 1,000 rows.

CERTIFICATIONS

- Meta Data Analyst with GenAI Professional Certificate (Coursera, 2025)
- Intermediate SQL (DataCamp, 2025) | Data Analysis in Excel (DataCamp, 2026)
- IBM SkillsBuild: Machine Learning and Data Science Lab; Generative AI Ethics (2026)
